						these sheets may be marked "superseded."	

## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/GB2004/003329

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1-22

1. Statement

Novelty (N)

Yes: Claims

5-8, 10, 11, 18-20

No: Claims

1-4, 9, 12-17, 21, 22

Inventive step (IS)

Yes: Claims

5-8, 10, 11, 18-20

No: Claims

1-4, 9, 12-17, 21, 22

Industrial applicability (IA)

Yes: Claims

No:

Claims

2. Citations and explanations (Rule 70.7):

see separate sheet

#### Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following documents:

D1: US-A-4 999 198 (BARNETT ET AL) 12 March 1991 (1991-03-12)

D2: WO 97/32559 A (DISPERSE TECHNOLOGIES LIMITED; WHEELER, DEREK, ALFRED) 12 September 1997 (1997-09-12)

2. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1-4, 9, 12-17, 21, 22 is not new in the sense of Article 33(2) PCT.

The document D1 discloses the preparation of drug delivery systems in polyaphrons form (see D1, col. 2, I. 23-46). The drug used in D1 is scopolamine. The description of the present application discloses on pages 9-13 a list of drugs presented as "poorly water soluble drugs". A great proportion of these are in faci water soluble (for instance all salts). Scopolamine has therefore to be considered also as porly water soluble drug. The hydrophilic phase disclosed in D1 is clearly comprised between 1 and 20% by weight, since col. 2 lines 23-42 dsicloses the presence of 5 ml of a hydrophilic phase, which is the foam.

Consequently, the subject-matter of claims 1-4, 9, 12-17, 21, 22 is not new over D1 ( Article 33(2) PCT ).

3. The documents D1 and D2 appear to be of particular relevance as far as inventive step is concerned (Article 33(3) PCT). These documents solve indeed the same problem, namely making compositions in form of biliquid foam, but for topical or transdermal forms. The problem of the present application being to make delivery forms adapted to oral delivery, the present application, as far as novel subject-matter is concerned, is considered to be inventive over D1 or D2 (Article 33(3) PCT).
